PROFILE

Highly experienced PHP & Laravel Back-End Engineer with a career spanning over 6 years. My expertise lies in developing scalable applications and writing code that is both clean and optimized for efficiency and maintainability. I am also skilled in Front-End development, with proficiency in Vue.js 3 and TypeScript. I effectively navigate complex development cycles to ensure project success. I have a strong background in Agile development practices and Scrum methodology, which I leverage to deliver exceptional results.

SKILLS

PHP	Agile/Scrum
Laravel	Docker
REST API	MicroService
Modular Programming	TypeScript
SQL Server	Mongo DB
PostgreSQL	Vue.js
HTML5	CI/CD
Sentry	Linux
JavaScript	TDD
Azure/API	Git
Open API	CSS

EMPLOYMENT HISTORY

Jun 2022 — present

Senior Software Engineer, CIS San Clemente, CA, **remote**

- Developed a sophisticated administrative panel for a prominent enterprise that garnered exceptional user ratings and drove user engagement, leveraging Laravel and Vue.js 3.
- Designed, developed, and deployed REST APIs using the Laravel framework to facilitate seamless communication between the front-end applications and the back-end.
- Collaborated with Vue.js and PrimeVue to create an intuitive and responsive user interface for the front-end.
- Utilized MySQL databases for robust and efficient data storage, ensuring the integrity and availability of critical data.
- Spearheaded the implementation of Continuous Integration and Continuous Delivery (CI/CD) practices, streamlining the software development and deployment process for increased efficiency.
- Managed cross-functional teams using Scrum methodologies within an Agile environment, fostering collaboration, transparency, and iterative progress.
- Implemented Sentry for real-time error monitoring and analysis, enabling proactive issue resolution and ensuring a seamless user experience.
- Simplified API usage for our customers by providing comprehensive and user-friendly API documentation using Open API.
- Managed a high-performing team using Scrum methodologies within an Agile framework, fostering collaboration, transparency, and the iterative progress of projects.
- Embraced the Test-Driven Development (TDD) methodology to craft software solutions that are robust, maintainable, and adaptable over time, ensuring long-term value and quality.

Feb 2019 — May 2022

Software Engineering, Medino

Iran, Tehran, **remote**

- Developed a medical application tailored to empower physicians to enhance their knowledge and expertise.
- Utilized PHP and Laravel for the design and development of the application, ensuring robust functionality and performance.
- Conducted comprehensive testing, including unit testing, integration testing, and code reviews, employing a variety of tools and frameworks to maintain code quality and reliability.
- Maintained and improved a diverse portfolio of over 10 panels, collaborating closely with product owners and designers to implement new features and enhance application performance.
- Achieved a remarkable 36% reduction in crash rates, in addition to successfully introducing new in-app purchase features that led to a 12% increase in revenue.
- Employed Vue.js and Next.js for the development of the user-friendly and responsive front-end interface.
- Contributed to a project that empowered clients to effortlessly monitor and analyze data with precision, enhancing their decision-making processes.

Sep 2016 — Feb 2019

Software Engineering, Ittaha

Iran, Neyshabur, **onsite**

- Designed and implemented a product that provides real-time tracking of family individuals on a map, enhancing their safety and peace of mind.
- Leveraged Instagram and Twitter APIs to seamlessly integrate social media features into various applications, enhancing user engagement and connectivity.
- Utilized Git as a distributed version control system for effective code management, collaboration, and version tracking.
- Took charge of system architecture design and conducted comprehensive testing to ensure optimal app functionality and performance, fostering a positive user experience.
- Employed MySQL for efficient data storage and manipulation, ensuring data integrity and accessibility.

EDUCATION

Apr 2012 — Jul 2016

BSc in Computer Science, University of Payam noor

Iran, Neyshabur

LANGUAGES

Persian – English
